

# I want to streamline my NDA process

With more than ten years of experience in law and legal tech, a training set comprising several thousand NDAs and state-of-the-art technology, we are the only vendor who can offer you a complete NDA solution that allows you to cut costs and improve adherence to company-wide policies.

## Why it matters

The process of negotiating and executing an NDA at the start of a commercial engagement, while a crucial step, takes time and resources away from your staff when they could instead focus on tasks more central to your business. In the absence of in-house legal counsel, it can also be expensive. Our solution allows you to automate the NDA process so you can get the ball rolling on new business transactions more quickly and cheaply.

## How we can help

- The first step in any commercial discussion with a potential partner, employee or consultant is to execute an NDA. Sometimes you are asked to provide the first draft, sometimes the other side will send a draft to you.
- **Whatever the posture, we have you covered.**
  - **Outgoing NDAs.** For outgoing NDAs, we can help you set up a **self-service tool** that you can share across the organization so business can generate compliant NDAs without you and your team getting involved.
  - **Incoming NDAs.** For incoming NDAs, we offer you machine learning tools to **improve compliance** and dramatically **reduce costs and/or free up your team for higher-value tasks by:**
    - Flagging problematic clauses
    - Conducting playbook checks
    - Benchmarking drafts against the market standard
    - Automatically preparing markups
    - Checking for defined terms

- In addition, our NDA solution helps you track the back and forth between the parties during negotiations, measuring **KPIs** such as turnaround times, lawyer performance and how many rounds of comments it takes to get to a signed contract.
- As with all other parts of Scissero, by licensing our NDA solution, you can always **upgrade to a full enterprise contract lifecycle management solution** later.

## A solution for both outgoing and incoming NDAs
