

Scissero

Too often, once a contract is signed, its terms are forgotten until a dispute arises, or the time comes for renewal or termination. Understanding the information locked in legal documents is key to making well-informed business decisions. Scissero is a data extraction platform developed by lawyers and data scientists that allows companies to quickly turn the contents of legal agreements into actionable business insights.

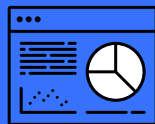

Our solution

- Data extraction engine with approximately 1,000 pre-trained data points
- Multi-prong extraction strategy using natural language processing, deep-learning neural networks and other types of machine learning
- Unique NDA solution, including scoring, issues spotting, defined terms checking, machine-assisted markups and analytics
- Integrated OCR tool for conversion of PDF documents (including scans) into DOCX format
- Online word processing and document negotiation platform with support for collaborative document editing
- Built-in contract authoring system for automatic drafting of documents based on the extracted data
- Workflow platform to route deals to internal and external stakeholders
- Multi-language architecture with out-of-the-box support for English, French and German (other languages can be added)
- One-click generation of reports in the form of bar charts, pie charts and tables

Contract negotiation

Negotiate first deal drafts via our web-based word processor, AI-based markup tool and Workflow platform.

Analytics and tracking

Extract data from contracts ready for download and visualize key metrics in a variety of formats.

Legal due diligence

Manage legal due diligence processes for M&A buy- and sell-side for capital markets.

Workflow

Receive alerts for key lifecycle events, such as contract renewal deadlines and rate hike decisions.

Benefits

Time savings

- Multiple extraction options
- Choose the optimal data extraction strategy for a given challenge
- Use a combination of strategies to tackle a problem from different sides

Pre-trained models

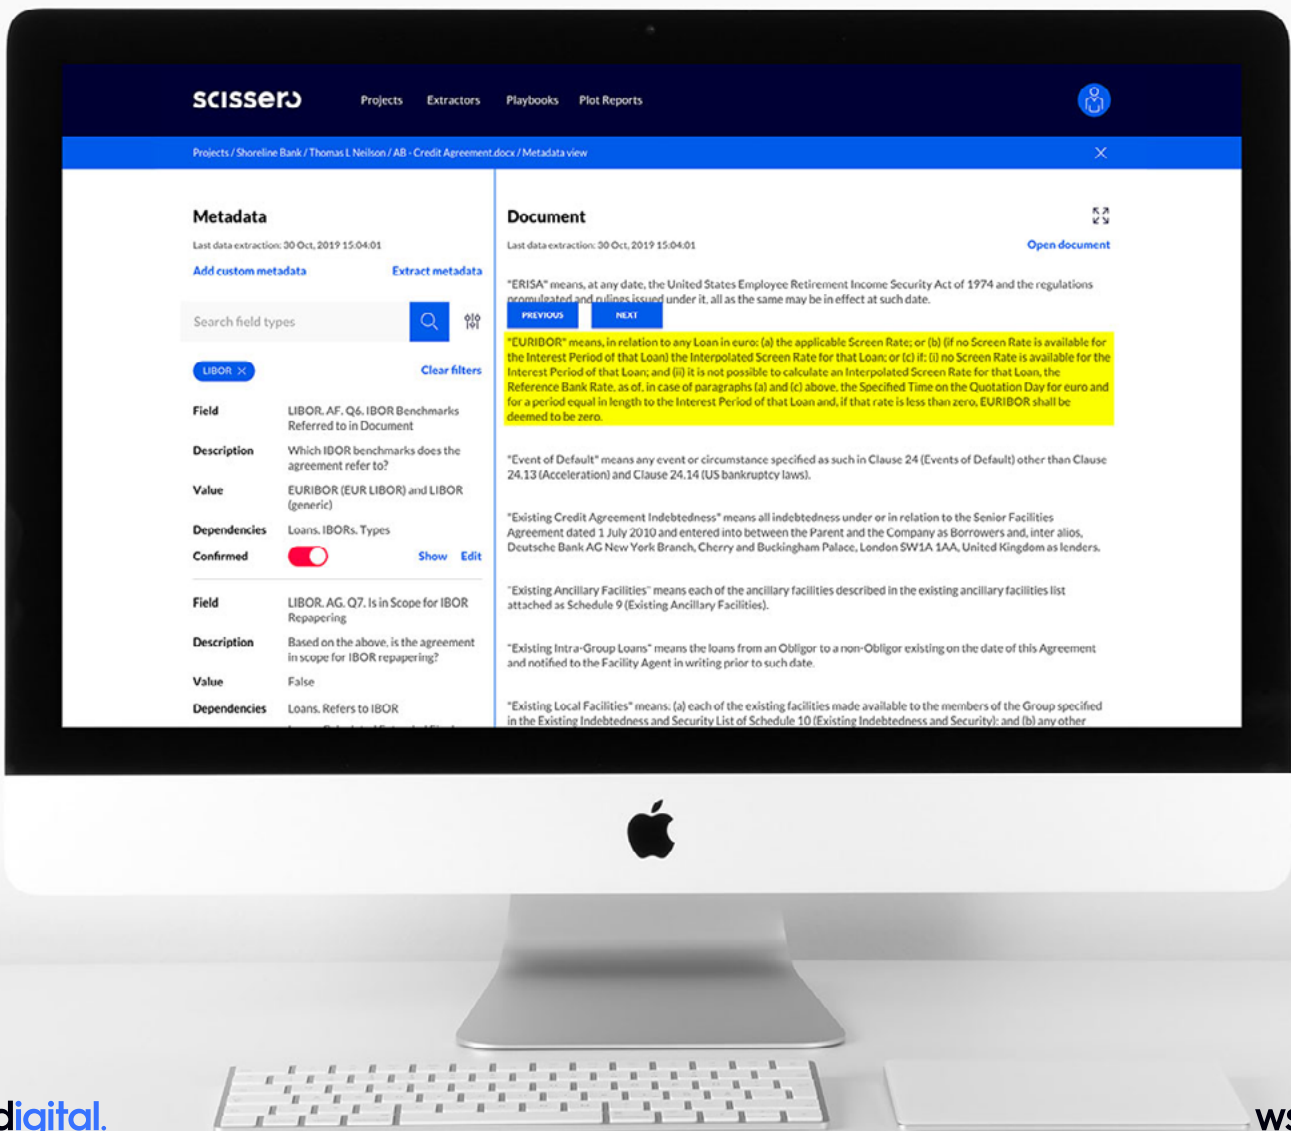

- Let us train the system so you can hit the ground running
- Use transfer learning to avoid reinventing the wheel

Unique domain know-how

- Get the benefit of working with professionals who know your industry
- Partner with a team of experienced lawyers and data scientists

Cutting-edge technology

- Have the assurance of always working with the latest technology
- Explore new ways of tackling old problems
